REMARKS

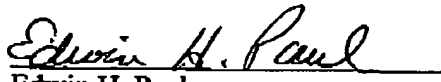

The Office Action determined that claims 2 and 6, that are drawn to FIG. 6, constitute a separate invention. This is respectfully traversed with the following rationale.

Claim 2 depends from claim 1. Claim 1 contains elements with a die package and a substrate and wires/runs that make electrical connections from the die to the substrate.

Claim 1 ends with the electrical connections completed from the die to the substrate. Claim 2 (and comparable method claim 6) adds apparatus (a lead frame) to continue making the electrical connections from the substrate through the frame to the outside world. That is what a lead frame does. It is not another invention. There should not be any substantial additional prior art searches on the lead frame, as searching for the die package will include those with a lead frame.

Please charge any additional fee occasioned by this paper to our Deposit Account No. 03-1237.

Respectfully submitted,
